PROFESSIONAL SUMMARY

Results-driven Business Analyst and Data Analytics professional with 2+ years of experience in data analysis, MIS reporting, business intelligence, and accounts receivable operations. Proficient in SQL, Python, Power BI, Tableau, and Excel for transforming complex datasets into actionable business insights. Demonstrated expertise in stakeholder management, process optimization, dashboard development, and cross-functional collaboration. Certified Business Analyst (IMS Pro School) with a strong foundation in data-driven decision-making and healthcare revenue cycle management.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy, Matplotlib, python-telegram-bot, aiosqlite), SQL (MySQL), DAX

Data Visualization & BI Tools: Power BI, Tableau, Excel (VBA, Pivot Tables, Power Pivot)

Design & Prototyping: Figma, Canva, UI/UX Design

Data & AI Skills: Data Cleaning, Statistical Analysis, Data Modelling, EDA, Generative AI, API Integration

DevOps & Deployment: Docker, Git, GitHub, Google Sheets API

Soft Skills: Business Requirements Gathering, Stakeholder Communication, Process Analysis

WORK EXPERIENCE

Accounts Receivable Associate (AR) | GeBBs Healthcare Solutions Pvt Ltd

July 2023 – Present

- Verified patient insurance eligibility and retrieved claims data from multiple payer portals, reducing denial rates by ensuring accurate pre-authorization and benefit verification.
- Researched and resolved account discrepancies, billing disputes, and credit history issues, maintaining a high collections rate and improving accounts receivable turnaround time.
- Generated weekly and monthly AR aging reports and financial statements using Excel, providing actionable insights to management for revenue cycle performance monitoring.
- Coordinated with collections, billing, and clinical departments to investigate and resolve billing errors, ensuring compliance with payer guidelines and HIPAA regulations.
- Prepared dispute batches, client briefs, and invoices while maintaining accurate records of payment statuses, credit notes, and account histories in the MIS database.

MIS Executive | SS Logistics

April 2023 – July 2023

- Managed operational workflows and client communications, ensuring timely resolution of logistics queries and maintaining high service delivery standards.
- Designed and maintained Excel-based MIS reports and dashboards, providing data-driven insights and recommendations to support senior management decision-making.
- Administered and maintained company databases, ensuring data consistency, accuracy, and integrity across all operational records.
- Collaborated cross-functionally with operations, finance, and logistics teams to understand data requirements and deliver customized reporting solutions.
- Created weekly performance reports with trend analysis, identifying process inefficiencies and recommending improvements that streamlined reporting timelines.

PROJECTS

British Airways Reviews Dashboard | Tableau | github.com/Mr667/British-Airways-Reviews-Dashboard

- Developed an interactive Tableau dashboard to analyze British Airways customer reviews, visualizing key performance metrics such as seat comfort, cabin staff service, entertainment, and overall ratings.

- Performed end-to-end data preparation including data cleaning, shaping, and joining country mapping data with review records to enable geographic and route-level analysis.
- Designed dynamic parameters and calculated fields to allow users to filter metrics by seat type, traveller type, aircraft, and date range for customized analysis.
- Built multiple chart types including line charts, bar charts, and geo-maps to communicate trends and patterns in passenger satisfaction across different routes and time periods.
- Delivered actionable insights on service quality gaps, enabling stakeholders to identify the lowest-rated service categories and target areas for customer experience improvement.

Blinkit Sales & Operations Dashboard | Power BI, Excel | github.com/Mr667/Blinkit-Dashboard

- Engineered an end-to-end Power BI dashboard for Blinkit analyzing grocery sales data across outlet types, item categories, and establishment years.
- Performed data cleaning and preprocessing in Excel, removing duplicates, handling null values, and standardizing formats to ensure reliable reporting output.
- Created 7+ KPI metrics including Total Sales, Average Sales, Average Rating, and Number of Items using DAX measures and calculated columns in Power BI.
- Designed multiple visualizations including donut charts, bar charts, stacked columns, and funnel charts to display outlet performance and item-type breakdowns.
- Implemented slicers and cross-filtering to allow business users to drill down by outlet location tier, outlet size, and item category for granular decision support.

Global Population Analytics Dashboard | Power BI | github.com/Mr667/Population-Dashboard

- Constructed a comprehensive Power BI dashboard visualizing global population trends, growth rates, and demographic distributions across countries and continents.
- Integrated and transformed large-scale population datasets using Power Query to ensure accurate, analysis-ready data including handling of missing values and normalization.
- Developed geo-spatial visualizations and choropleth maps to illustrate population density and growth patterns, enabling intuitive geographic comparison across regions.
- Created time-series trend charts and year-over-year comparisons to analyze population growth trajectories, highlighting regions with the highest demographic shifts.
- Incorporated interactive filters for year range, continent, and country to allow stakeholders to perform self-serve analysis and extract tailored demographic insights.

Coffee Shop Sales Analysis Dashboard | Excel (Advanced) | github.com/Mr667/Coffe-Data-Set

- Built a fully interactive Excel dashboard to analyze coffee shop order trends, customer behaviour, and revenue performance using advanced Excel features.
- Applied XLOOKUP and INDEX-MATCH functions to dynamically retrieve and cross-reference customer, product, and order data across multiple worksheet tables.
- Utilized Power Pivot and Pivot Tables to aggregate and model large transactional datasets, enabling fast summarization of sales by product type, country, and time period.
- Implemented Slicers and Timelines for intuitive filtering by coffee roast type, loyalty card status, and order date, enhancing dashboard interactivity for end users.
- Applied Conditional Formatting and chart visualizations to highlight top customers, best-selling products, and seasonal sales trends for data-driven inventory decisions.

Spotify Analytics Dashboard | Power BI | github.com/Mr667/Spotify-Dashboard

- Designed and developed a Power BI analytics dashboard for Spotify music data (2023–2024), providing a comprehensive overview of song metrics, artist statistics, and popularity trends.
- Built a star schema data model by cleaning and transforming raw Spotify datasets, establishing relationships between tracks, artists, and release metadata for optimized query performance.

- Implemented advanced DAX measures including Average Duration, Total Explicit Songs, and time-intelligence calculations to surface granular streaming insights and content trends.
- Created a custom dark-mode UI/UX layout mirroring the native Spotify app experience, with interactive slicers for seamless navigation across artists, genres, and release types.
- Uncovered key business insights including seasonal peaks in song releases (July/October), the dominance of Album over Single releases, and top-performing artist trends to support content strategy decisions.

Dubai Real Estate Telegram Bot | *Python, Telegram Bot API, SQLite, Google Sheets API, Docker* | github.com/Mr667/Telegram-Bot-for-Dubai-Real-Estate-Agency

- Built a production-ready, 24/7 Telegram chatbot in Python using python-telegram-bot to automate real estate property discovery for a Dubai agency, handling Rent/Sale queries with a fully conversational interface.
- Integrated an asynchronous Bayut API client (bayut_api.py) to fetch live Dubai property listings based on user-selected location and transaction type, delivering real-time results within the chat.
- Implemented automated lead capture to Google Sheets via the gspread library, securely logging user contact details, search criteria, and timestamps to a live CRM sheet for agent follow-up.
- Designed a lightweight SQLite session management system (aiosqlite) to persist user conversation state across interactions, ensuring seamless multi-step dialogue without data loss.
- Deployed the bot to a cloud server using Docker and PM2 with a custom deploy.sh script, implementing rotating file logging and a heartbeat monitoring task to guarantee continuous 24/7 uptime.

EDUCATION & CERTIFICATIONS

B.Sc. Biotechnology – Tilak College of Science & Commerce, Mumbai University 2020 – 2023

HSC (Science) – SK Bose Jr. College, Dombivli 2018 – 2020

Certification in Business Analysis (BA) – IMS Pro School, Thane Jan 2023

HONORS & AWARDS

- Second Position – Elementary Drawing Government Examination (B Grade), SSDV School, 2016
- First Position – Intermediate Drawing Government Examination (A Grade), SSDV School, 2017
- First Position – Intra-School Taekwondo Competition, Vivekanand Sports Academy, 2016
- Second Position – DSO Taekwondo Competition (District Level), Thakur College, Kandivali, 2017
- Captain – College Football Team, Reliance Foundation Youth Sports Tournament, 2019

EXTRA-CURRICULAR ACTIVITIES & VOLUNTEERING

- DLLE Member (Dept. of Lifelong Learning & Extension), Tilak College, 2022–23
- Volunteer, Survey of Women's Status (SWS) – Conducted community surveys on women's social, economic, and educational status; managed questionnaire design and ethical data collection, 2023
- Volunteer, Tree Plantation Drive – Assisted in planting, record-keeping, and event coordination for beach and green-space restoration initiative by Ecologic & Innovations, 2022
- Organizer, Blood Donation Camp, Tilak College – Successfully planned and executed a college-wide drive that collected 800+ units of blood, coordinating logistics, volunteers, and medical teams, 2022

ADDITIONAL INFORMATION

Date of Birth: August 15, 2002 **Nationality:** Indian **Languages:** Hindi, English, Urdu **Marital Status:** Single
